

## The Virtual Learning Assistant

### Personalized Tutoring Powered by Artificial Intelligence

Cognii

What are the structures of a typical neuron?

Student

Neurons are the basic building blocks of the nervous system. A neuron consists of dendrites and a cell body called soma.

Cognii

Very close! Would you like to explain the neural transmitter?

✓ **Instant assessment of open response answers**

✓ **Evaluates conceptual understanding**

✓ **Significant cost savings**

✓ **K-12, Higher Ed & Corporate Training**

**Cognii** is the leading provider of Artificial Intelligence based educational technologies to K-12, Higher Ed, and Corporate Training markets. Cognii's award-winning **Virtual Learning Assistant** provides automated assessment of students' open response (short essay) answers along with personalized tutoring. Today, students across the U.S. are benefitting from Cognii's Virtual Learning Assistant and are finding it highly satisfactory:

*"I was happy to know exactly where I went wrong. Cognii's guidance led me in the right direction."*  
— a student at Bunker Hill Community College

*"Cognii is a leading vendor for exponentially growing AI market in Education 2017-2021."* — Technavio

*"Cognii is an example of a futuristic AI technology in practice today."* — Consortium of School Networking
